This module listing information will also be sent to the Clean Energy Regulator in the next set of scheduled updates, which is done weekly on Friday morning.  
Note that it may take up to 2 weeks for the changes to appear on the downloadable approved modules list (.pdf), because this list is only updated every fortnight.  
Note that CEC listing is dependent on IEC certificates remaining valid. A new certificate requires a new application to CEC.  
Modules shipped from the factory from 1 June 2015 onward, are required to carry the appropriate certifier mark (TUV, VDE, UL etc) for these certificates.
